

YSHIELD® FL4 | Edge sealant | 10 ml

Strictly required edge sealing for our window films RDF72 and RDF25.

Strictly required edge sealing for our window films RDF72 and RDF25. There is a high risk of corrosion to the foil edges due to the metal layers when this sealing is not used!

- Coverage: 10 ml lacquer for 100 linear meters foil edge or cut parts of about 20 linear meters window film.
- Scope of delivery: Paint stick with 10 ml lacquer

Please note: Do not apply the edge sealant until 8 weeks after installing the window film, so that excess water can evaporate!
